

How to Connect to Your School's WiFi:

1. Open the WiFi setting on your device
2. Select the WiFi with your school location code (ex: 0123-WiFi)
3. Enter the password for your school's WiFi to connect

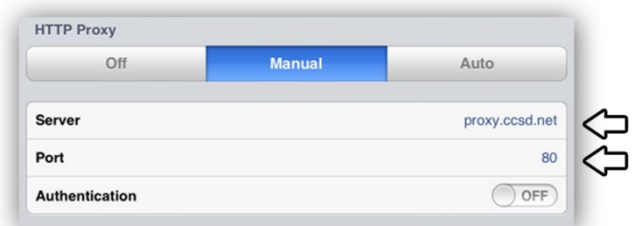

Note: The WiFi connects through a proxy and provides filtered Internet. It is important that parents monitor their student's use of the Internet with the iPad outside of school. While the Internet will be filtered for inappropriate material when used at school, it will not be filtered while connected to a home or public network.

Wi-Fi not working? Try these 3 quick tips to fix it!

Turn Wi-Fi off for 5 seconds, then back on.

Make sure the proxy is set correctly.

Reboot your iPad.
