

Summer Fun Learning Activities Guide 2016

Eighth Grade

Reading Tips for Students

- Make a time and a place for reading in your home.
- Use technology to access e-books (iPod, iPad, Kindle, etc.).
- Figure out the main lesson of the story. Find quotes from the story helped you understand the main lesson.
- Look for dialogue in the story that is important to character and plot development. What do the characters say that help push the story forward?
- Figure out how the author creates different points of views for different characters. What do the different points of view tell you about the story overall?
- Check yourself while you read. Do you remember what you read? If not, reread.

Writing

- Encourage your child to keep a personal journal or diary to tell his/her own stories.
- Include your child in real-life writing experiences (e.g., writing letters or e-mails to family members) and encourage the use of idioms, adages and proverbs.
- Encourage your child to practice typing on the computer. There are many free typing activities and games for kids on the Internet.
- Encourage your child to write a friendly letter to a relative, friend or a letter to the editor of a newspaper.

Mathematics

- Roll a pair of dice two times to determine two ordered pairs. Graph the line that passes through those points. Roll the pair of dice two more times to determine two additional ordered pairs. Before graphing the second line, predict what the relationship between the two lines is (intersecting, parallel, perpendicular, etc.). Graph the second line to check your prediction.
- With a partner, deal out cards face down. Each player turns a card over so that it is face up. Using addition, subtraction, multiplication, or division, create the largest number possible. Black cards are positive numbers and red cards are negative numbers.
- Practice basic arithmetic operations by playing Krypto® (available online at www.mphgames.com).
- Explain how a change in one dimension alters the volume of a solid or the area of a figure.
- Build a structure out of household items. Without showing the structure, explain and describe it to your parent using geometric terms. Then ask the parent to build the same structure without your assistance. When completed, reveal the structures and see if they match.
- Search your home, a magazine, or the Internet for examples of similar and congruent figures. Explain why these figures are similar or congruent

Summer Fun Learning Activities Guide is published annually.
Clark County School District Communications Office
5100 W. Sahara Avenue, Las Vegas, Nevada 89146-3406

Science

- Using a magazine or newspaper, collect ads for products and services that were not available 30 years ago. Discuss the scientific advancements that have made these new products and services available to the public.
- Look through the classified ads for science-related jobs. What kind of education or training would you need for these jobs?

American Teenager by Laura B. Edge

Heart and Soul: The Story of America and African Americans by Kadir Nelson

Treasury of Greek Mythology: Classic Stories of Gods,

Goddesses, Heroes & Monsters by Donna Jo Napoli

Note to Parents

CCSD offers the above list of links to summer reading lists and resources in our continued support of student achievement and the love of reading. Book lists cover a wide range of topics and interest levels. It is the parents’ responsibility to verify the appropriateness of any book for their child. Also, please check with your child’s school online, as many schools provide summer reading lists that support site-specific programs and classes.
