

STUDENTS CAN HELP BUILD OUR NATIONAL PARK UNIT!

Here are a few opportunities for students to get involved and help build our national monument for future generations.

Educational Outreach March 13-31

Students can learn about the Tule Springs Fossil Beds National Monument.

In March, CCSD students may learn about Clark County's national park unit, the Tule Springs Fossil Beds National Monument, in their classrooms. Students can find out about fossils, the Pleistocene epoch, and ice age animals like Columbian mammoths, sabre tooth cats, and giant sloths that lived in Clark County! Plus, they can find out how to help protect endangered wildlife and plant species that can be found there today. Want to learn more? Visit nps.gov/tusk.

T-Shirt Design Contest

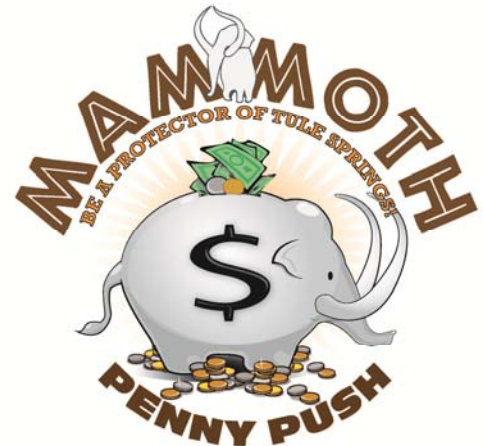

All students are encouraged to submit a t-shirt design to encourage the community to protect our park.

The winning design will be sold throughout the next year to help Protectors of Tule Springs raise funds to create educational resources for Clark County schools. Visit ccsd.net/mammothpennypush for details and complete rules.

Mammoth Penny Push March 27-31

Students are encouraged to donate spare change to Protectors of Tule Springs to support our national monument.

Donations will be collected in select schools and prizes will be awarded at the school, team, and classroom levels. All classrooms that raise at least \$50 in donations will be entered into a drawing for additional parties/prizes.

Join the Protectors of Tule Springs

To thank Clark County students, Protectors of Tule Springs is offering half-price family memberships to CCSD students, staff, and their families during the month of March.

Members enjoy the first choice of slots on any interpretive walks, access to special tours, discounts on logo merchandise, and receive a newsletter. To take advantage of this half-price family membership and support our national monument, visit Protectors of Tule Springs at tulespringslv.com and click on the "Become a Member" button.
