

SPECIAL DIET REQUEST

POLICIES

This guidance is based on the policy guidelines outlined in the Food and Nutrition Services Instruction 783-2, Revision 2, Meal Substitutions for Medical or Other Special Dietary Reasons.

Under Section 504 of the Rehabilitation Act of 1973, and the Americans with Disabilities Act (ADA) of 1990, a “person with a disability” means any person who has a physical or mental impairment which substantially limits one or more major life activities, has a record of such impairment, or is regarded as having such impairment.

An IEP (Individualized Education Program) must be completed. An IEP is a written statement for a child with a disability that is developed, reviewed, and revised in accordance with the IDEA (Individuals with Disabilities Education Act) and its implementing regulations. The IEP is the cornerstone of the student’s educational program that contains the program of special education and related services to be provided to a child with a disability covered under the IDEA.

USDA regulations 7CFR Part 15b require substitutions or modifications in school meals for children whose disabilities restrict their diets. A child with a disability must be provided substitutions in foods when that need is supported by a statement signed by a licensed physician. The Physician’s statement must identify:

- The child’s disability
- An explanation of why the disability restricts the child’s diet
- The major life activity affected by the disability
- The food or foods to be omitted from the child’s diet, and the food or choice of foods that must be substituted, including changes in food texture

Children with food allergies or intolerances DO NOT have a disability as defined under either Section 504 of the Rehabilitation Act or Part B of IDEA, and the school food service may, but is not required to, make food substitutions for them. However, when in the licensed physician’s assessment, food allergies may result in severe, life-threatening (anaphylactic) reactions, the child’s condition would meet the definition of “disability”, and the substitutions prescribed by the licensed physician must be made.

When a child with disabilities requires a change in a diet order, the parent must provide documentation with accompanying instructions from a licensed physician. This is required to ensure that the modified meal is reimbursable, and to ensure that any meal modifications meet nutrition standards which are medically appropriate for the child.

PROCEDURES

1. Assess student
2. Complete IEP
3. Obtain physician’s statement
4. Submit to CCSD Food Service Department
5. If any changes in diet are required, submit a revised physician’s statement
