

## COMMUNITY AGENCIES

The following is a partial list of the community agencies that offer services and assistance for parents and adolescents confronted with substance abuse and/or other related mental health problems. This list is not all-inclusive, but is an informational source for low-cost, high-cost and sliding-scale referral agencies and services that might be utilized by educators and parents/guardians. It is recommended that if you are interested in a respective agency, you contact them directly or work through your insurance provider, as CCSD will not recommend, suggest, or advise anyone on a specific agency's services.
