# CCSD – WIFI Training and Setup Document

**1.**

This is what you should see in the lower right corner of your desktop if wireless is detected.
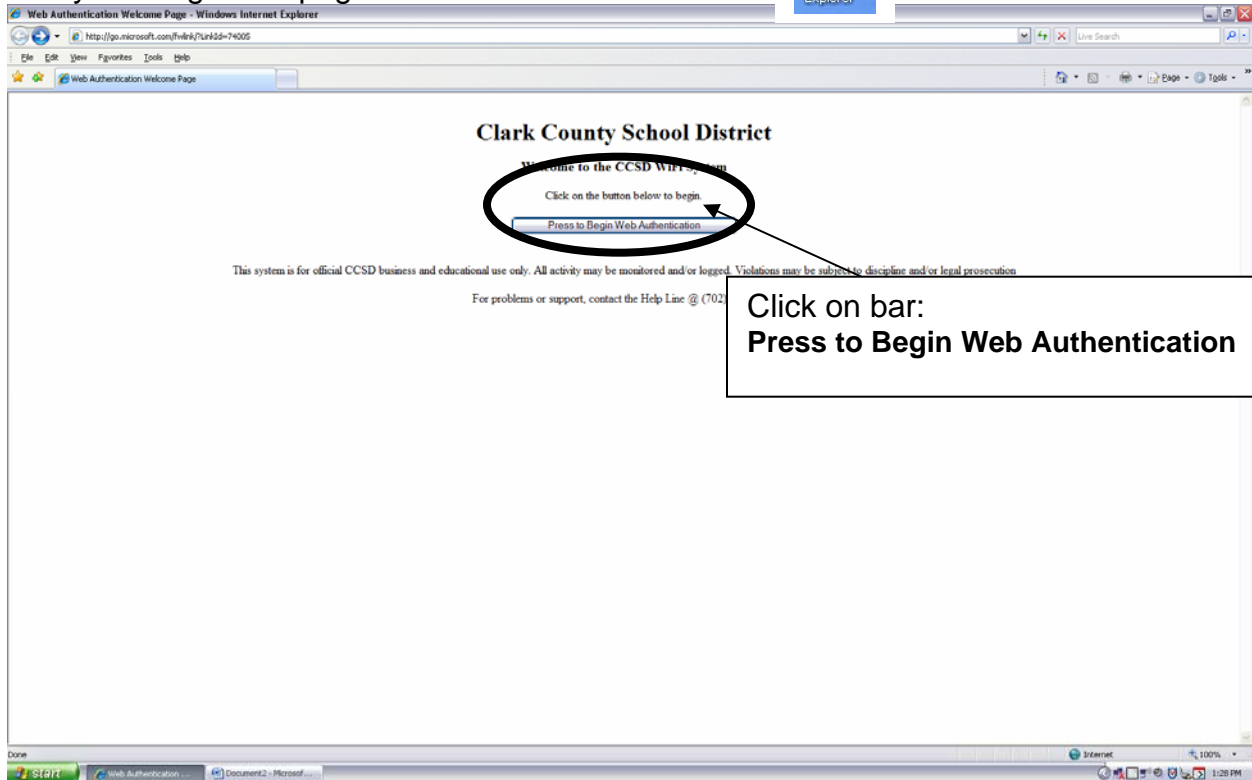

**2.**

Disable
**Status**
Repair

View Available Wireless Networks

Change Windows Firewall settings

Open Network Connections

Right click on the same icon and this box opens. Left click on the second item:
***View Available Wireless Networks***

**3.**

**(¹))) Wireless Network Connection**

**Network Tasks**

Refresh network list

Set up a wireless network for a home or small office

**Related Tasks**

Learn about wireless networking

Change the order of preferred networks

Change advanced settings

Choose a wireless network

Click an item in the list below to connect to a wireless network in range or to get more information.

CCSD-WIFI                                                      Connected
   Security-enabled wireless network (WPA)

0021-WIFI                                                      Automatic
   Security-enabled wireless network (WPA)

hpsetup                                                       On Demand
   Unsecured computer-to-computer network

You should be auto-connected to the CCSD-WIFI if it is available. It indicates strength by the green bars to the right. Close this by clicking the RED X.
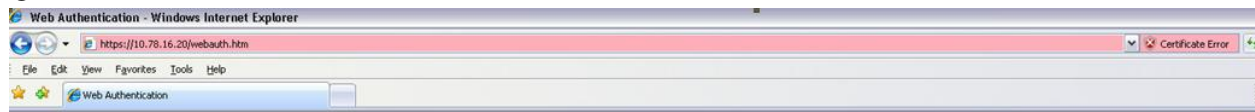

**4.** Double Click on Internet Explorer on your desktop
And you will get this page:

Click on bar:
**Press to Begin Web Authentication**

**5.**

Click on the second link:
***Continue to this website***

Created: 4/13/2009 for Netbook access at school sites

**6.**

Enter your User ID and Password assigned to you through Networking Services. You receive this through your InterAct email account once you have filled out a Network Access Form.

**7.**

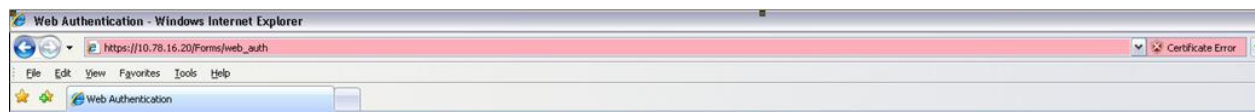

Once your login is successful your access is good for the next 8 hours. You can close this page and click on the **Maximo shortcut** from your desktop or go to **Favorites** and access any work related websites.
